Program 4: To-Do List Application

4. Develop a To-Do List Application using React functional components that demonstrates the use of the us

Step-1: Create React Application

```
npx create-react-app todo-app
```

Step-2: Modify App.js

```
import { useState } from 'react';

export default function App() {
  const [t, s] = useState([]);
  const [v, sv] = useState('');

  return (
    <div style={{ textAlign: 'center' }}>
      <h3>To-Do</h3>
      <input value={v} onChange={(e) => sv(e.target.value)} />
      <button onClick={() => v && (s([...t, { i: Date.now(), v, d: 0 }]), sv(''))}>
        Add
      </button>
      {t.map(x => (
        <div key={x.i}>
          <span
            onClick={() => s(t.map(y => y.i === x.i ? { ...y, d: !y.d } : y))}
            style={{ textDecoration: x.d ? 'line-through' : '' }}
          >
            {x.v}
          </span>
          <button onClick={() => s(t.filter(y => y.i !== x.i))}>X</button>
        </div>
      ))}
    </div>
  );
}
```
